DEMO TOMOCUBE XT-X1 PLUS

APRIL 7TH-10TH | CIBA

Microscopy and Imaging Core Facility of the Aragon Health Sciences Institute (IACS) in collaboration with **Lasing**, invites you to participate in the DEMO of the innovative 3D Holotomographic Microscopy technique using the Tomocube HT-X1 Plus system.

From April, 7 to April 10.

Centro de Investigación Biomédica de Aragón.

Join Us for a Live DEMO of 3D Holotomography

Discover the power of Tomocube HT-X1 Plus and its key applications in 3D label-free live-cell imaging:

- **Cell Biology & 3D Cultures –** Observe cells as they are, in monolayers or complex 3D structures like organoids, with no need for staining.
- **Regenerative Medicine & Immunology** – Study dynamic cellular processes, differentiation, and immune responses in real physiological conditions.
- **High-Throughput Screening** – Speed up drug discovery with fast image acquisition and multi-well plate compatibility.

See the technology in action and explore its impact on your research.

Scan the QR and sign up now to join the demo!
